Detailed Action

Response to Amendment

1. The Examiner accepts the amendment to the abstract, specification and claims as required in the previous office action.

Allowance

2. Claims 1-40 are allowed. The following is an examiner's statement of reasons for allowance:

In reference to claims 1, 23 and 37: Hanson (U.S. Patent 6,378,013) teaches a system for assessing performance of a device, such as a hard drive (see Hanson, Fig. 3 and column 2, lines 21-44). The method includes acts of establishing a virtual drive. The processor is configured to transfer data between the virtual drive to the hard drive subsystem, and measuring the transfer rate of the subsystem. Another embodiment of the system includes a program storage device storing instruction when executed by the computer perform a method of measuring the performance of the hard drive in a computer.

However, Hanson does not teach that the system specifies one or more different required data transfer rate. The claimed invention further includes a method that measures the actual data transfer rate for each access pattern and

determines performance of the storage device in relation to at least one required data transfer rate as a function of the required data transfer rate and the actual data transfer time of data for a given access pattern.

The remaining claims are dependent upon claims 1, 23 and 37 and contain further limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
